Quarto tips

Chengkun Li

Building the website

Unicode `\u200B` for zero width space, e.g., in `_quarto.yml` I used it for an item in the navigation bar with icon only. Note that I tried HTML's `​` but it doesn't work.

Extensions for adding icons such as google scholar and 500px ⑤ (see the website's footer):

```
.
  quarto-ext
      fontawesome
  schochastics
      academicons
```

For trials

(Genton 2001)
